WORK EXPERIENCE

1/10 – Present

Factory Design Labs, Denver, CO

Lead small development teams in a test-driven, paired programming environment. Projects included cloud migration and maintenance of Audi of America's Inventory Management System, backend development of the House of Vans iPhone App, and a complete redesign of The North Face's website across multiple countries and languages.

2/07 – 12/09

Freelance

Contracted to develop web applications with Ruby on Rails, both individually and with an existing development team.

2/06 – 2/07

Xylem Interactive, Denver, CO

Worked individually and in teams building and maintaining sites for Red Robin, Best Buy, US Cellular, Jimmy Johns, and Jack Link's Jerky. Development included Ruby on Rails, PHP and Java Spring for both Flash and HTML websites.

2/04 – 1/06

Creation Chamber, Denver, CO

Completed dynamic Flash development projects, using Flash Remoting, XML, and socket communications. Built web application for automated deployment of sites using Java Spring and Apache Ant.

Built Linux shared and dedicated hosting infrastructure, and development environments. Installed and configured internal source control, defect tracking, and development infrastructure.

11/01 – 11/03

Nuclear Management Company, Hudson, WI

Helped plan and execute Windows 2000 migrations for Point Beach and Kewaunee Nuclear Power Plants, including configuration and maintenance of Active Directory, deployment of Cisco networking equipment, and scripting installation of desktop applications.

Designed and developed an Intranet application for performance evaluations using Classic ASP and MS-SQL Server.

6/00 - 10/01

Gulfstream Aerospace, Westfield, MA

Responsible for administration and maintenance of a Windows NT and Novell network of 150 computers and 200 users, including AS/400 support and PBX administration.

EDUCATION

2/03

Completed Microsoft Certified Systems Engineer certification for Windows 2000. MCP ID# 2879214.

5/00

High School Graduation, St Mary High School, Westfield, MA
